

Recently I was on a trip and was waiting for my flight at the airport. As I was waiting in the airport, I began observing the people around me, and I started looking at the various methods by which people were communicating. People were using their phones to text, send emails and talk to others. Sometimes, they snapped pictures and used pictures to support their messages. Others were verbally exchanging, while one couple was communicating by American Sign Language (ASL). Some people used gestures to indicate to others that they could go before them. It is incredible when you sit back and observe how humans communicate with each other. As educators, we have a unique opportunity to help our students explore communication and find the right fit for them. Communication is indeed not a one size fits all!

Communication is any act by which one person gives to or receives from another person information about that person's needs, desires, perceptions, knowledge, or effective states. Communication may be intentional or unintentional, may involve conventional or unconventional signals, may take linguistic or nonlinguistic forms, and may occur through spoken or other modes (ASHA, 1992).

Get Ready to accept all forms of communication for effective instruction and participation. "All persons, regardless of the extent or severity of their disabilities, have a basic right to affect, through communication, the conditions of their own existence." (ASHA, 1992)

Be respectful of the rights of all people for communication during all daily routines, interventions and strategies.

Get Set to provide inclusive practices and multi-modal activities to enhance learning for students using all forms of communication

Multimodal Grid of Activities

• Think of all the ways students can be creative and communicate what they have learned in various ways. Students love the power to choose! Don't want to give them all of these options? Pick a few now and change it up as the school year goes on.

Addressing Communication Needs

• Learn how to support students' communication in an inclusive classroom.

Do's and Don'ts of AAC - Multimodal Communication

AAC Boot Camp: Top 10 AAC Implementation Tips

 Have a student who uses AAC? Check out these tips for making sure they are participating and communicating in the classroom.

Go use these resources to support the communication needs in your classroom.

Person-Centered Communication Partner Checklist

• Staff or students need more information on how to be a better communication partner to someone who uses AAC? This checklist helps to find areas of need.

Communication and ASD: Communication and Social Skills Lesson Plans

 Want to learn more about communication barriers? VCU-ACE has resources in various formats to help break down what might be preventing a student from being able to express themselves.

AAC Boot Camp: Getting AAC Users Communicating

Clear and to the point chart about what to do and what not to do with AAC users! Print to
give to students, staff or parents, hang it up as a reminder to everyone or use it as a way
to structure a short staff training on AAC.

AAC Language Lab Lesson Plans

 Have instant access to a variety of activities that you can do with your students based on specific language objectives.

Get Practical Ideas for Building Language

Check out ideas and materials to support modeling and AAC learning
